

Automatic filling unit for pre-mixed foam extinguishers

Model RES600

High performance and ease of use

DESCRIPTION

RES600 is an automatic unit allowing to fill the extinguishers with pre-mixed foam. It is an high performance equipment, easy to be installed and ultra-fast-working. The unit is equipped with an integrated electrical panel board: by setting the recipe on the display, the machine stops automatically once the correct weight has been reached.

In order to fulfill most demanding needs of filling, the unit is available in two versions, one equipped with the transfer pump, the other one without the pump. In this version, the filling is achieved by fall.

The equipment is high-performing since it allows to fill the extinguishers quickly and accurately without any dispersion of product.

It is manufactured according to EC Machine Directive and thus EC marked.

COMPONENTS AND DEVICES

- > Electrical panel board
- > Scale for weight control
- > Filling control system
- > Drip-proof system
- > Filling hose
- > Support frame

Automatic filling unit for pre-mixed foam extinguishers
